New Text Messaging Interface

PowerSoftMD now interfaces with www.appointmentreminders.com, which includes the following features:

Scheduling Texts:

- 1) Automatically send text messages to patients as appointment reminders
 - If the text message fails, the message will be sent as an email
 - If both the text message and email fail, optionally a voice message can be sent
- 2) Patients can reply to the text message to confirm their appointment and **PowerSoftMD** will *automatically* update the schedule to reflect the confirmation.
- 3) New and established patients can receive different text message content.

Recall Reminders Texts:

- 1) Text, email, and voice messages can be sent for future recall reminders, asking patients to call to schedule their appointment.
- 2) Optionally, you can even send reminders for patients that are 3, 6, or 9 months past due for their recall appointment.

Individual Texts:

- 1) You can also manually send and/or respond to individual texts.
