

www.AppointmentReminders.com

Features

PowerSoftMD now interfaces with www.appointmentreminders.com. The interface can **Text**, **Email**, and/or send **Voice Mail** reminders.

Pricing is based on approximately 1700 reminders per month. All 2 Way communication is included in the price of 1 appointment reminder (i.e., could be up to 3 text messages)

Level 1 - \$100/month, you run the process and interface with website manually.

Level 2 - \$200/month, the process and website interface can be run automatically.

Scheduling Reminders:

- 1) Send text messages to patients as appointment reminders.
 - If the text message fails, the message will be sent as an email
 - If both the text message and email fail, optionally a voice message can be sent
- 2) Patients can reply to messages to confirm their appointment and **PowerSoftMD** can update the schedule to reflect the confirmation.
- 3) New and established patients can receive different text messages.

Recall Reminder Reminders:

- 1) Text, email, and voice messages can be sent for future recall reminders, asking patients to call to schedule their appointment.
- 2) Optionally, you can even send reminders for patients that are 3, 6, or 9 months past due for their recall appointment.

Individual Texts:

- 1) You may manually send and/or respond to individual texts.

Batch Text Messages:

- 1) You can also select groups of patients via the Patient Search by Criteria report, and send them all the same text, a text Blast! This could be used to market new services, etc.
