

Sizing and Positioning Screens

Most PowerSoftMD screens can be sized and positioned where you want on the screen. Then you can use the Top **“Tools”** option and select a **“Save Screen Size and Location”** option. Note: This setting is saved based on Workstation and UserID.

The screenshot shows the 'PowerSoft MD - General Information' window. The 'Tools' menu is open, and the 'Save Screen Size and Location' option is highlighted. Two red arrows are present: one pointing to the 'Tools' menu and another pointing to the highlighted option.
